CHELSEA VILLAGE

Chelsea Village is a highly regarded accommodation camp in the Mogadishu International Airport (MIA) zone. It is home away from home to many internationals working for humanitarian and development aid agencies operating in Somalia. Our aim is to provide a comfortable, secure and quality experience.

THE LOCATION

Set in the MIA (Mogadishu International Airport zone), the challenge was to create an accommodation camp that could cater to the highest possible standards despite the location. The site was devoid of any infrastructure when building started in 2014.

THE RESULT

Created and managed by Enigma Alliance Smart Site Services, Chelsea Village opened its doors in 2015 hosting guests in high-end custom-made container accommodation.

Today, Chelsea Village offers in-house catering, video conference facilities, office space and camp security compliant with UN MOSS standards as well as mobile security for guests travelling into the city.

With current capacity for 140 people, Chelsea Village continues to grow and improve. Chelsea Village now offers a world-class GymCap fitness facility and plenty of recreational areas for guests to relax in. And future plans involve a basketball court and conference and training centre.

The Chelsea Village team is a balance of both expatriates and locals. The Chelsea Group has a policy of ensuring that local communities are part of a sustainable company and 42% of the team are Somalis.

WHAT'S ON OFFER

Wi-Fi

Parking

Catering

Laundry

Air conditioning

Power generation

Offices

Video conference facility

GymCap

ENIGMA ALLIANCE

Enigma Alliance company COG (Camp Operating Group) is skilled in building and managing camps to the highest possible standards in challenging environments.

Enigma Alliance is unique within the remote camp management industry in being able to offer the design, build, installation and management of the camp from catering to water solutions. Offering clients a custom-built camp and bespoke management service, the Enigma Alliance team are remote-site specialists who have worked in some of the most logistically challenging locations in the world.

Our remote-site services include:

- COG: Planning, building and managing of camps
- NapCap: Custom-made container accommodation
- WaterCap: Potable water to WHO-standards
- GymCap: Expert-endorsed modular gyms
- Ongoing service management

ACCOMMODATION

Designed by NapCap and crafted by European shipbuilders to ISO standards, the container rooms are brought to you by people who have spent years working in dangerous environments. Our container rooms are ready-made from welded steel and have extra over-head protection. Easily transportable, able to withstand extreme temperatures, the NapCaps are designed for fast assembly around the world.

WATER SOLUTIONS

Specialists in water-purification and waste management, WaterCap's mobile plug and play Reverse Osmosis (RO) systems provide clean 4th Edition World Health Organisation-standard drinking water straight from the tap. Pre-engineered and modular in design, they allow for simple connection and maintenance. The Mobile Water Treatment Plants can be skid mounted and containerised to suit any environment. WaterCap recently installed a desalination plant at Chelsea Village, in an effort to conserve the local water table and to ensure water security for our guests and staff. Thanks to WaterCap, you can drink water straight from your tap while staying at Chelsea Village.

GYMCAP

GymCap is a container gym built to ISO standards that is easily transportable and quick to assemble, providing high-quality physical training solutions that are ideal for remote environments. GymCap offers clients cardio equipment with the latest low-maintenance, self-powered treadmills, rowers, air bikes and cross trainers, as well as storage and weight-pulley systems. A broad spectrum of small equipment is included that can be adjusted to suit customer requirements.

SECURITY

Chelsea Village security conforms to UN MOSS standards with an on-site Security Manager here to make sure all of our guests remain safe. The skilled security management team is also able to provide mobile security support to guests travelling into the city, on request.

COGNITIVE DESIGNS

Cognitive Designs can bring a little bit of home into your compound and take out the sterility that is so often prevalent on remote locations. Our interior designer can not only re-design your space, but source all the required products and materials, including recycling current materials, arrange shipping and transport, and complete the re-fit using Enigma Smart Site Services' trained expatriate crew of skilled electricians, plumbers, craftsmen and decorators.

'The security provided by the steel container rooms is the best and I sleep more soundly at Chelsea Village than elsewhere (but maybe that's their double beds!).'

LILY S

'Very impressive staff – always helpful and able to provide solutions. I will continue to bring clients.'

MARCUS P

'Overall for the field mission the score is 10/10! Many thanks.'

JAMSHED R

'Superb food. Impressive under the circumstances.'

DAVID B

'The whole set up you have is excellent. Your reputation in country is incredibly high - and we can see precisely why.'

CHRIS G

THE CHELSEA GROUP

Chelsea Village is a Chelsea Group project. This group of companies offers a diverse range of solutions from smart site services, to power production, to international humanitarian support and risk management. With a global presence, the Chelsea Group is able to offer clients truly integrated services.

The Chelsea Group companies whose services are used at Chelsea Village:

ENIGMA ALLIANCE

Experts in building quality camps in challenging locations through our company COG (Camp Operating Group), Enigma Alliance's portfolio of products was created with the challenging environments of remote site operations in mind. From bespoke modular accommodation (NapCap), water purification systems (WaterCap) to modular gyms (GymCap), Enigma Alliance makes the inhospitable, home offering full camp builds or individual products. Enigma Alliance built and manages Chelsea Village, our secure camp in the MIA, Mogadishu. www.enigma-alliance.com

HART NATIONWIDE

Supporting security measures at Chelsea Village, Hart Nationwide is a partnership between internationally recognised private security company Hart and Nationwide Enterprise, a leading service provider in East Africa. Hart Nationwide is excellently placed to deliver security solutions to those involved in enhancing the future of Somalia.

CTG

Providing unique support to the humanitarian and development community in fragile and conflict-affected countries, CTG specialise in the rapid mobilisation and management of skilled and unskilled personnel. They operate in 24 countries with ongoing projects in Somalia. With offices in Chelsea Village, the CTG team is readily available to support their consultants working in-country - many of whom are also guests at Chelsea Village.
